ZXJ14 Harmonic Reducer

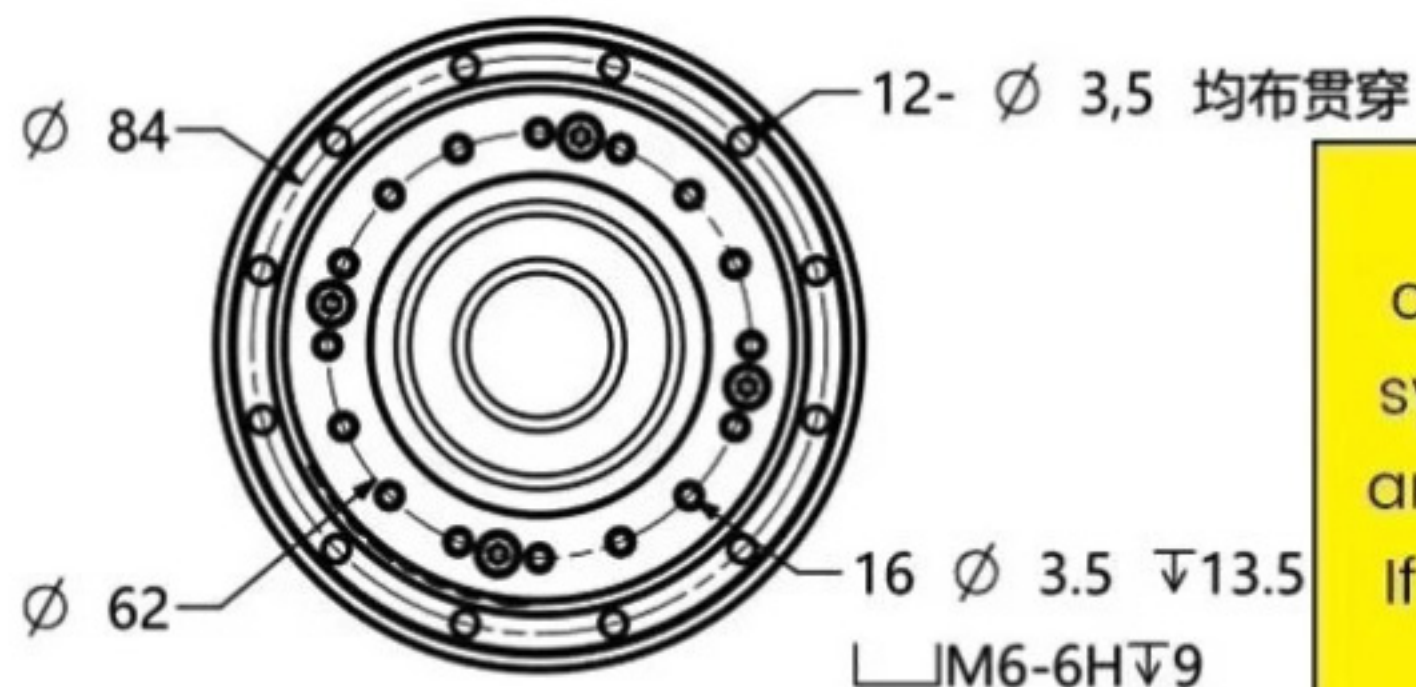

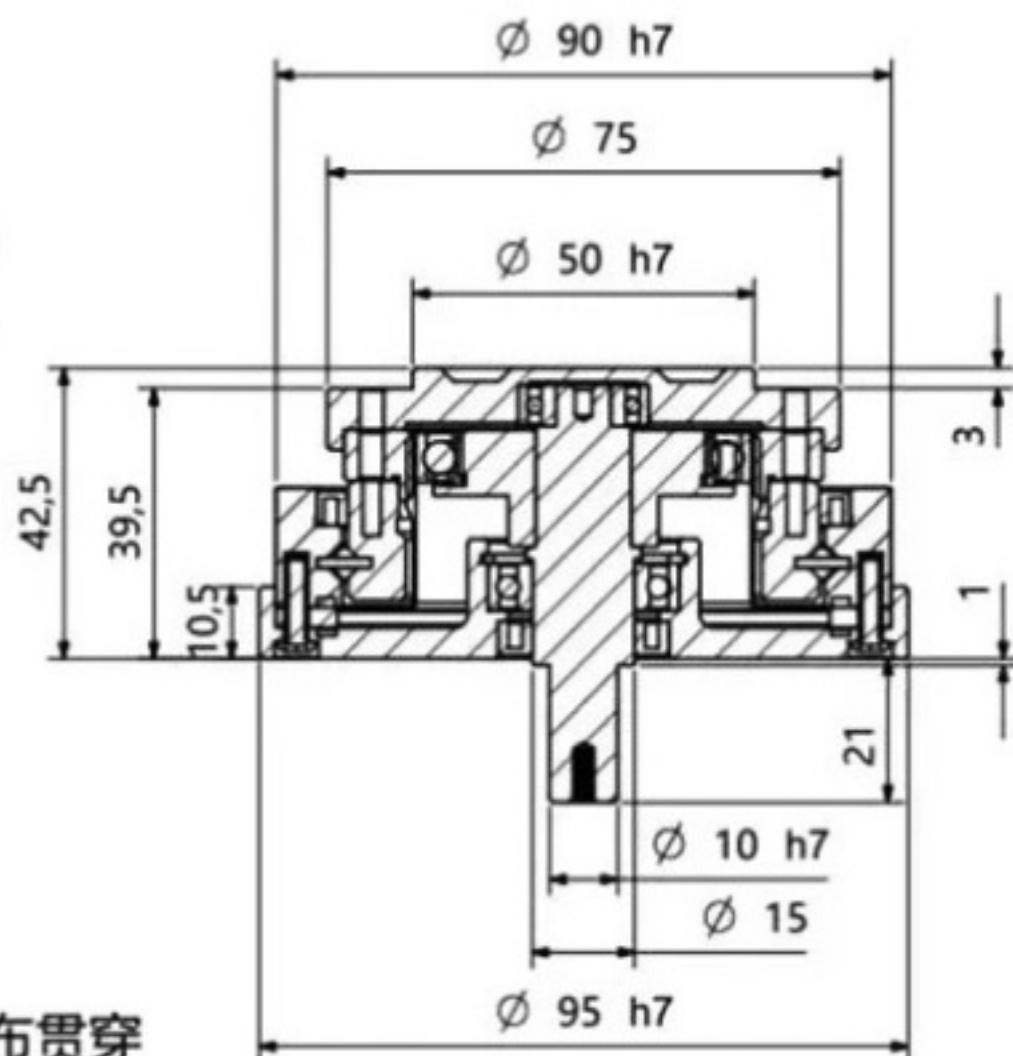

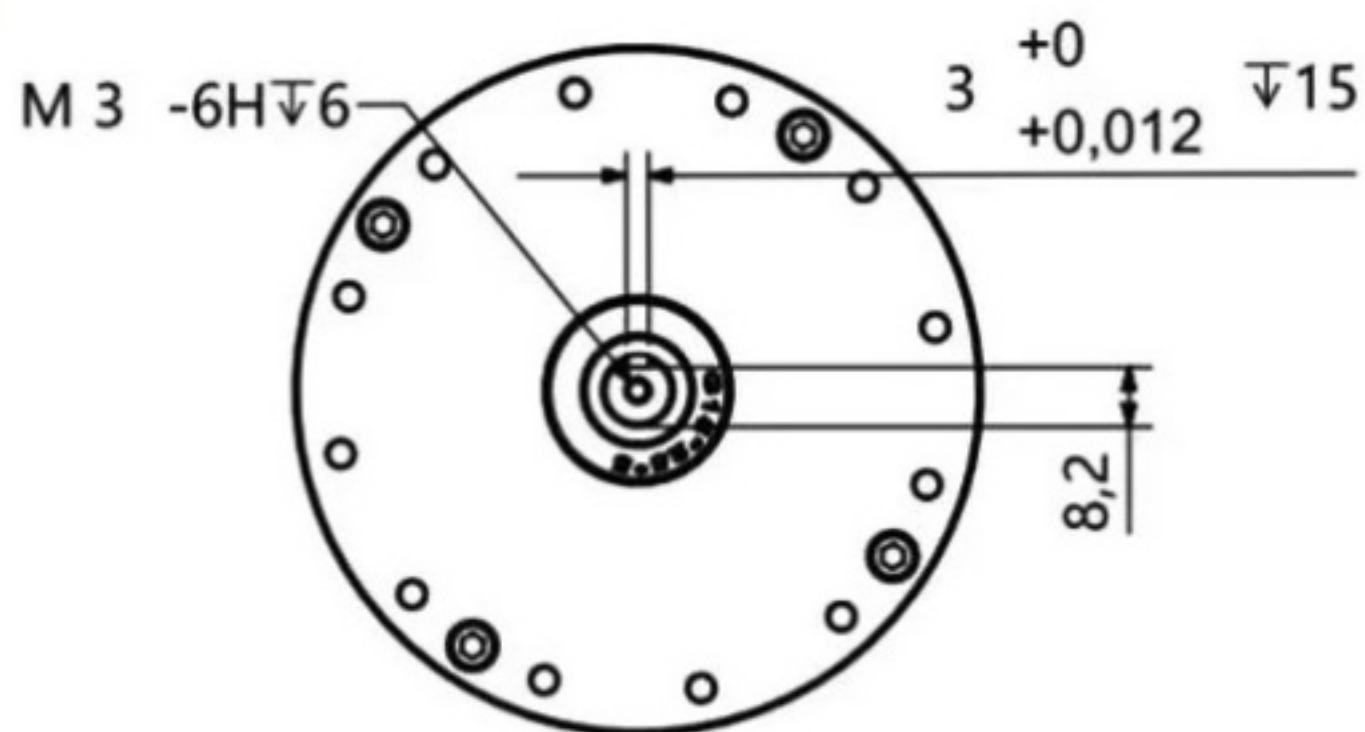

This harmonic reducer is connected to the motor using synchronous wheels and belts, and is not equipped by default. If you need it, you can contact us for customization.

ZXJ17 Harmonic Reducer

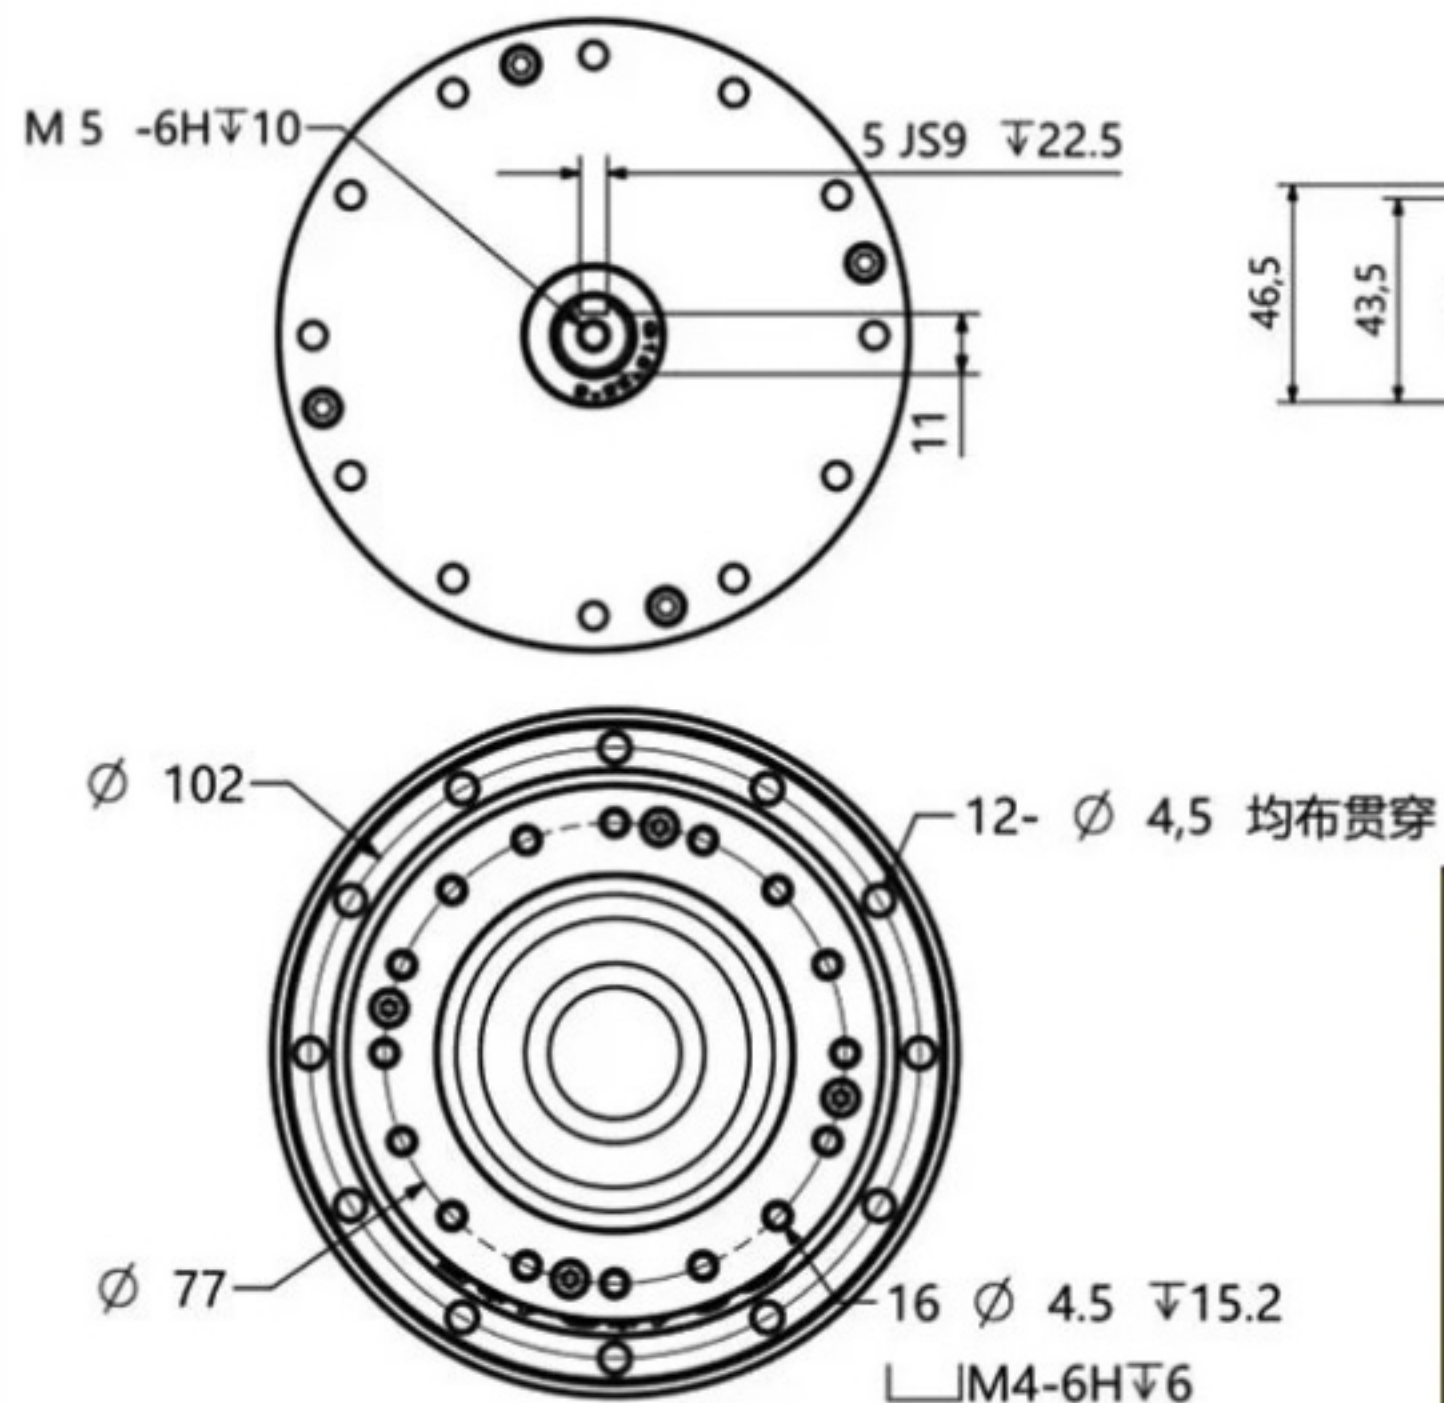

This harmonic reducer is connected to the motor using synchronous wheels and belts, and is not equipped by default. If you need it, you can contact us for customization.

ZXJ20 Harmonic Reducer

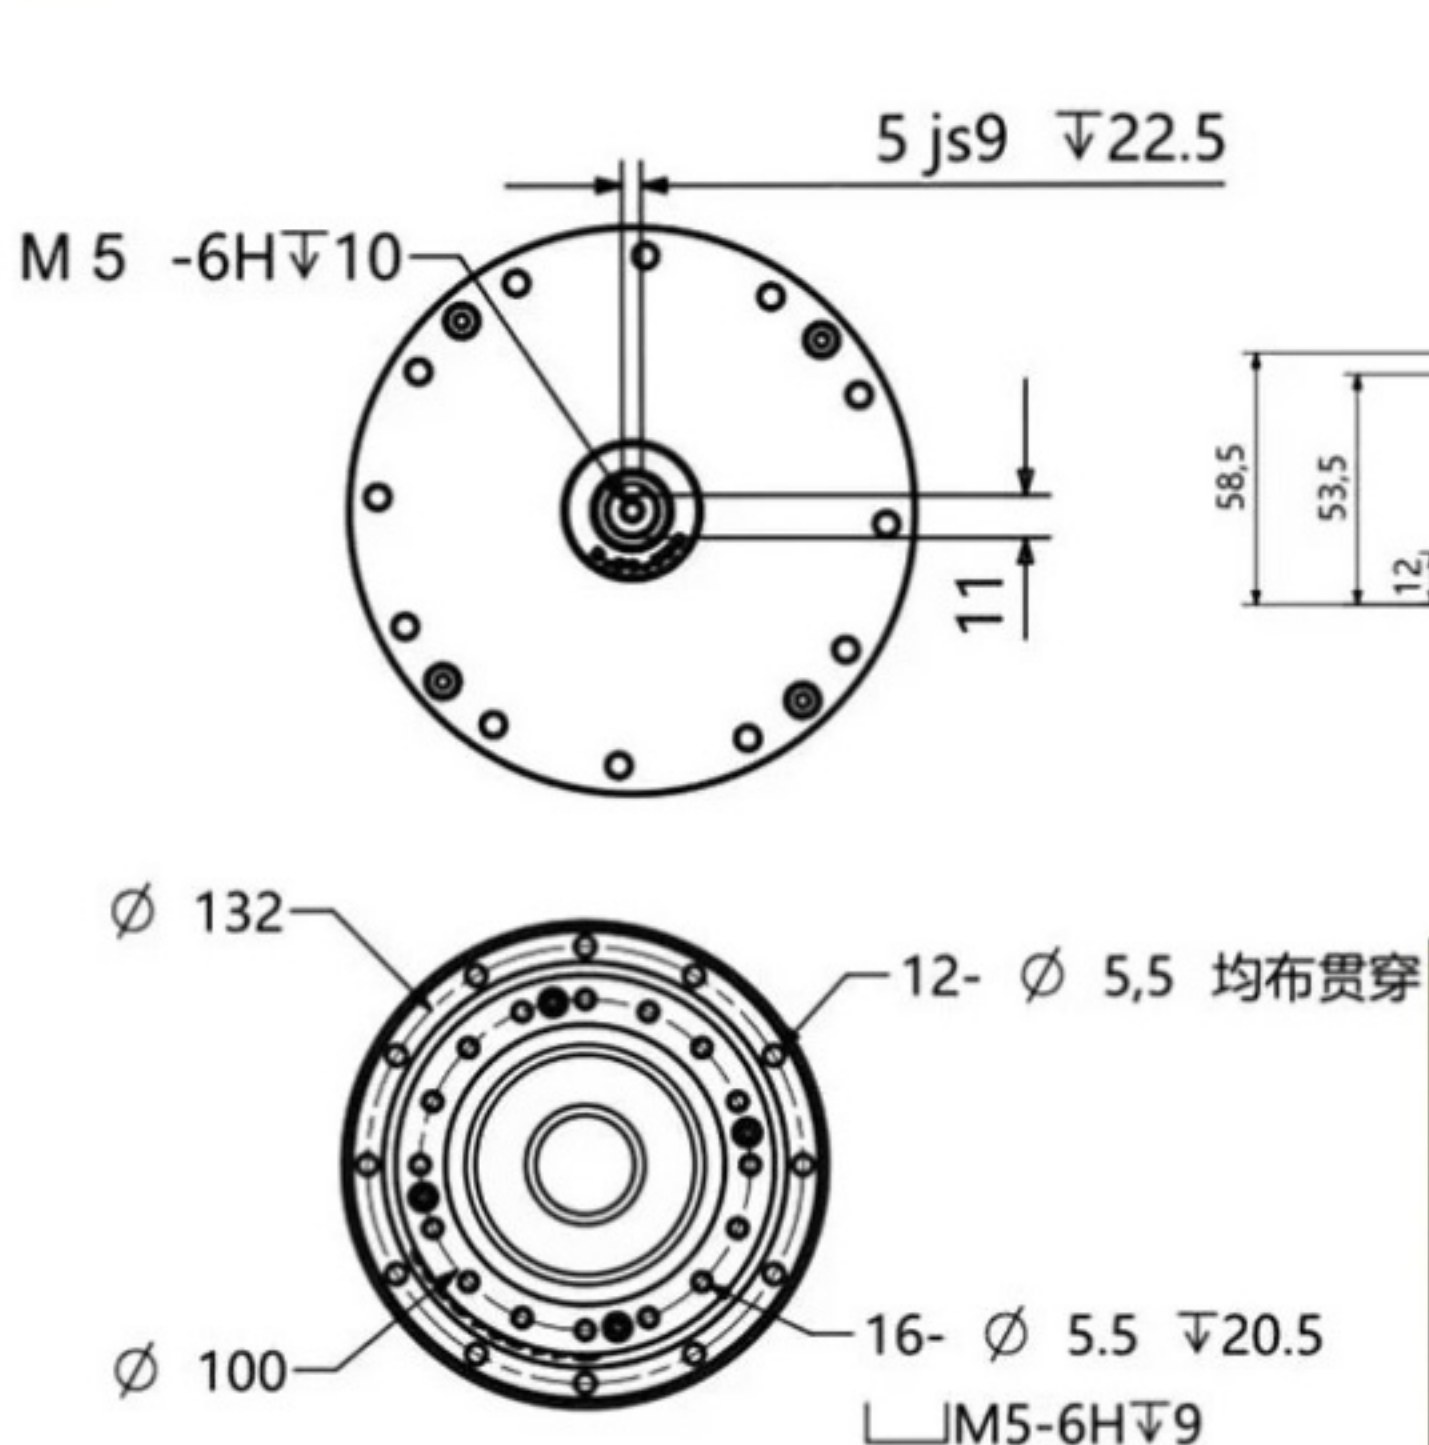

This harmonic reducer is connected to the motor using synchronous wheels and belts, and is not equipped by default. If you need it, you can contact us for customization.

ZXJ25 Harmonic Reducer

This harmonic reducer is connected to the motor using synchronous wheels and belts, and is not equipped by default. If you need it, you can contact us for customization.

ZXJ32 Harmonic Reducer

This harmonic reducer is connected to the motor using synchronous wheels and belts, and is not equipped by default. If you need it, you can contact us for customization.
